DETAILED ACTION

Amendment A, filed Feb 19, 2003, has been entered.

Claim Objections

Claim 5 is objected to because of the following informalities: "Polyphenylene sulfide resin" should be --polyphenylene sulfide resin--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Borgis (US 4988912).

Regarding claim 1, Borgis discloses an insulating plug for a discharge lamp device with a body having a front end portion (8) and a rear end portion, and arc tube (column 3, lines 20-37) fixedly held at the front end portion and a lamp-side connector provided at the rear end portion arranged so that a power-supplying connector can be attached to and detached from the lamp-side connector, with the body being made of a glass-fiber-reinforced plastic (column 3, lines 12-20).

Regarding claim 3, Borgis discloses a discharge lamp device provided with an insulating plug.

Claim Rejections - 35 USC § 103

Art Unit: 2879

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borgis (US 4988912) in view of Peters et al. (US 6409372) and Ishida et al (US 6410678).

Borgis discloses all of the above claim limitations and the glass-fiber-reinforced plastic includes from 20 weight % to 80 weight % glass fibers, but fails to clearly point out using polyphenylene sulfide resin and 40 weight % to 60 weight %.

Peters discloses using glass fibers contained in a polyphenylene sulfide resin in order to give the lamp cap comparatively small dimensions and increase safety.

Peters fails to clearly point out from 40 weight % to 60 weight % glass fibers.

Ishida discloses the use of from 40 weight % to 60 weight % glass fibers in order to improve rigidity.

Hence it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the lamp of Borgis with the glass fibers contained in a polyphenylene sulfide resin in order to give the lamp cap comparatively small dimensions and increase safety, as taught by Peters and from 40 weight % to 60 weight % glass fibers in order to improve rigidity, as taught by Ishida.

Response to Arguments

Art Unit: 2879

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
